

QUALITY AND ENVIRONMENT POLICY

Be Charter Boats S.L. is a company dedicated to the rental of Beneteau boats, leading firm of the current nautical market. We are a company committed to offering direct and personalized attention to our clients and a first class charter service.

Our mission is to offer the best professional, efficient and effective service, through the implementation of a continuous improvement system. The continuous search for excellence is our goal and our company culture.

Our business vision is reflected in the following principles:

- The satisfaction of our customers is the main objective of BE CHARTER. We work for the client in continuous pursuit of excellence.
- Commitment to protect the environment, including the prevention of pollution and compliance with legal requirements.
- Quality, safety and reliability are our working tools to maintain the confidence of our customers and thus guarantee our position as leaders in the current highly competitive charter market in which we find ourselves.
- Our template is our strength. Your training and well-being is part of our company culture. We are committed to training and taking care of our employees with adequate training and work and family conciliation policies, all for your satisfaction and a professional and committed work. These are pillars of our values.
- The enthusiasm, motivation and pride of belonging to the staff of BE CHARTER is the basis of the daily challenge of the management of the company.
- The establishment of objectives, subject to revision, frames the policy of continuous improvement of the organization. The improvement is INFINITE.
- We are committed to comply with the requirements of our clients, legal and regulatory.
- The application and monitoring of these principles is based on an active commitment on the part of the entire BE CHARTER team.

To this end, the company's management is committed to providing the necessary technical and human resources and together with all its team, is fully convinced that these are the keys to becoming leaders in our sector, and also provides the framework for the establishment of the environmental objectives.
